CHA families rely on the foundational stability provided to them by CHA housing as they continue to maintain employment and earn wages at higher levels than CHA families in the past. In addition to the housing, CHA’s programmatic offerings and services allow residents to improve their overall prospects and quality of life. Furthermore, the families that remain engaged with CHA’s services are more likely to increase their movement on the scale than those who are not engaged. In the last calendar year, approximately 1% of all CHA public housing families have increased one or more steps on the graphic below.
